Commemorating 100 years of the Great Socialist October Revolution of 1917

Hanoi, Vietnam, September 26-27, 2017

Preliminary Program

1. The evolutionary law of mankind in the 21st Century

1. The evolutionary Law of Global Society (Modernity) in the 21st Century: a deterministic chaos and hierarchical Darwinian survival system, with one attractor and zero degrees of self-determination for Nations and People.

Heinz Dieterich, Raimundo Franco, Juan Carlos Olgún, Iván Limón; Germany, Cuba, Mexico, CTS-Autonomous Metropolitan University

2. The 100th Anniversary of the October Revolution (1917) and the historical importance of 20th Century Socialism; the 4th Technological Revolution of Mankind and the strategic political options for humanity the world system offers: the American Dream under Trump, the Chinese Dream under the core leadership of Xi Jinping and 21st Century Socialism.

Heinz Dieterich, Coordinator WARP/CTS, Mexico/Germany, 100th Anniversary of the October Revolution 1917; Eudoxio Morales, University of Puebla, BUAP, Mexico

2. The post-capitalist Political Economy

3. The post-market non-chrematistic economy, based on labour-values, information technology and democratic decision making by the producers and people.

Paul Cockshott, Department of Computer Science, Glasgow University, UK

4. A macro-statistical proposition for a democratic and ecological Post-Market Economy in Germany, the 4th most advanced World Economy, based on labor-values and eco-taxes, according to its official statistics for the year 2010; elaborated by

Carsten Stahmer, former Coordinator for Input-Output statistics, Federal Government, FRG; presentation N.N.

5. The post-market Micro-Economic operative system and the Magic Triangle (Carsten Stahmer) of product calculation through monetary, volume and labor input-output tables, illustrated with an empirical study of a mid-size German bio-engineering firm.

Stefan Rehfus, Eco-Engineer, FRG

6. The Asian, post-occidental rural-urban civilization of the 21st Century ⁽¹⁾

Xuejun Liu, Fusuo Zhang, China Agricultural University (CAU), Beijing

3. The post-bourgeois Democracy and State Order

7. Scaling laws and effects of the universe: the fundamental problem for Participatory Democracy and its unsatisfactory solution in Representative Democracy.

Heinz Dieterich, Juan Carlos Olguin, Emiliano Silva, Center for Transition Sciences (CTS), Universidad Autónoma Metropolitana y Universidad Obrera de México (UOM), Mexico City

8. The basic logistical interface of Participatory Democracy: secure, anonymous cell phone-voting. Karen Renaud or Paul Cockshott, Department of Computer Science, Glasgow University, UK

9. Does the anthropological and neurobiological condition of homo sapiens permit a functioning Participatory Democracy? The eternal predicament of biological and cultural “DNA”, Genes and Memes.

Gernot Ernst, University of Oslo, Kongsberg Hospital, Norway

4. The bipolar Geopolitical World Order: “The West” (USA-EU-Japan) vis-à-vis the Euroasian Power Block (China-Russia)

10. The Nature and Evolution of contemporary market-based economies: International Research Project.

Dimitri Pletnev, Chelyabinsk State University, International Research Project

11. The impact of the Trump Presidency on the world system and world peace

Alfredo Jalife-Rahme, Geopolitical strategist, UNAM, RT columnist, WARP, Mexico City

12. The Geostrategic situation of the dominant world powers and the global military-political tendencies of evolution in the World System

Konstantin Sivkov, Ph.D. in military sciences, President, Union of Geopolitics, Moscow, Russia

Ad 1: A CAU research group, pending on the authorization of Prof. Fusuo Zhang and the corresponding authorities of CAU, will research the feasibility of a New Civilization Model for socialist Asian developing nations, like China, Vietnam, Laos, based on the 4th technological revolution and a balanced demographic rural-urban interaction-structure, instead of the asymmetric historical urbanizing model of the West.
